Sheffield	47%	10%	26%	1%	2%	5%	8%
S Yorks	51%	10%	22%	1%	2%	6%	8%

Notes: * The living arrangements variable is different to marital status. It combines information from both marital status and the relationship matrix. Therefore a person living as part of a 'cohabiting couple' could in fact be married (to someone else) but will not appear as married or separated in this classification. ** A person not living in a couple can be classified married (or re-married) if they denote their marital status as married (or re-married) but have no spouse or partner resident in the household.

Notes: * A dependent child is a person in a household aged 0-15 (whether or not in a family) or a person aged 16-18 who is a full time student and in a family with parent(s). ** For the Census, part-time is defined as working 30 hours or less a week. Full-time is defined as 31 or more hours a week. *** For the purposes of this table, a lone parent is defined as a parent with a dependent child living in a household with no other persons (whether related to that child or not). This definition is to be distinguished from the standard definition of a lone parent used in other tables.

Sheffield	28%	33%	27%	11%	1%
S Yorks	26%	33%	29%	12%	1%

Notes: 1. Selected characteristics are defined within the four dimensions as follows: Employment: Any member of the household aged 16-74 who is not a full-time student is either unemployed or permanently sick. Education: No member of the household aged 16 to pensionable age has at least 5 GCSEs (grade A-C) or equivalent AND no member of the household aged 16-18 is in full-time education Health and disability: Any member of the household has general health 'not good' in the year before Census or has a limiting long term illness Housing: The household's accommodation is either overcrowded (occupancy indicator is -1 or less), OR is in a shared dwelling OR does not have sole use of bath/shower and toilet OR has no central heating 2. This selection of household characteristics does not relate to any National Statistics indicator of deprivation or disadvantage. 3. The classification is independent of the DTLR Index of Multiple Deprivation.

Household Amenities, i.e. rooms, amenities, central heating and lowest floor level

All households	Average household size	Average number of rooms per household	Households with an occupancy rating of -1 or less*	Households with central heating and sole use of bath/shower and toilet	Households without central heating or sole use of bath/shower and toilet	Households without central heating; with sole use of bath/shower and toilet	Households with central heating; without sole use of bath/shower and toilet	Households; Lowest floor level; Basement or semi-basement	Households; Lowest floor level; Ground level (street level)	Households; Lowest floor level; 1st/2nd/3rd or 4th floor	Households; Lowest floor level; 5th floor or higher

S Yorks	2.36	5.20	5%	94%	0%	6%	0%	5%	87%	7%	0%

Notes: * The occupancy rating provides a measure of under-occupancy and overcrowding. For example; a value of -1 implies that there is 1 room too few and that there is overcrowding in the household. The occupancy rating assumes that every household; including 1 person households; requires a minimum of 2 common rooms (excluding bathrooms).
